

SUPPLIER OF CERTIFICATION SERVICES:

Industry & Service • Health & Food
Construction & Sustainability

PRICE LIST AS PER 1 JANUARY 2011

CERTIFICATION AND VERIFICATION

VA, MK AND ETA APPROVALS – ETA DENMARK

PRODUCT CERTIFICATION

APPROVAL OF MEDICAL DEVICES – DGM

OTHER SERVICES

CERTIFICERING

CERTIFICATION AND VERIFICATION

Hourly rates

General hourly fee:	DKK 1,420 per hour
Transport fee:	DKK 690 per hour

Required time

The time required depends, for example, on the company's size and area of business.

The closing of nonconformities and observations are invoiced according to hourly rates.

Transport expenses

Transport expenses are invoiced according to actual expenses. Transport is calculated in accordance with state rates.

Annual fee

An annual fee per issued certificate registration number covers the following:

- publication of valid issued DS certificates on DS Certification's website
- maintenance of accreditations
- entry into bilateral agreements with other certification organs, e.g., IQNet.

The size of the fee can be found in the table on the back page.

Offer

Companies can arrange to receive an offer by contacting DS Certification.

Rescheduling of audits and inspections

Audits or inspections may be rescheduled without further cost up until 4 weeks prior to the scheduled audit date. In the event of rescheduling later than 4 weeks prior to the audit date, costs will be invoiced according to the following guidelines:

Between 4 - 2 week prior to the audit date, 50 % of the audit costs (hourly fee) will be invoiced. Less than 2 weeks prior to the audit date, 100 % of the audit costs will be invoiced (hourly fee).

Terms of payment etc.

Invoicing occurs upon completion of services. All prices stated are excluding VAT. Terms of payment are net 15 days. Paid fees will not be returned upon cancellation of the agreement or withdrawal of the certificate/verification. Price regulation takes place 1 January.

Certificates

Fees in connection with certification cover issue of a DS certificate framed in aluminium or a certificate in PDF format together with one IQNet certificate in connection with certification of quality and environmental management systems.

BRC certificates are issued in A4 format in English.

In connection with initial certification, re-certification, 3 year reviews and conversion, the initial certificate is issued free of charge.

The company is welcome to request additional identical certificates any time. The certificates are issued in standard form with Danish and/or English text and can be issued in other languages upon request. Any additional costs connected with translation are to be paid by the customer upon further agreement.

Certificate presentation

For certificate presentation, an additional fee applies of one hourly fee as well as transport in accordance with state rates, plus any toll fees.

Supplementary certificates

Additional DS certificate and/or additional IQNet certificate in A4 format:	
Inclusive aluminium frame per item	DKK 770
Exclusive aluminium frame per item	DKK 450

Additional DS certificate and/or additional IQNet certificate in A3 format:	
Inclusive aluminium frame per item	DKK 840
Exclusive aluminium frame per item	DKK 520

Electronic copy (PDF) of certificate:	DKK 450
Amendment to existing certificate:	DKK 450

Discount for purchase of several identical certificates:

1 - 5 items	list price
6 - 20 items	list price - 30 %
more than 20 items	list price - 50 %

Verification in accordance with EMAS regulation

In accordance with EMAS regulation, costs in connection with the verification of environmental management systems cover issue of a DS-certificate. The company is welcome to request additional identical certificates, which are available in standard form in Danish. The certificates can be made available in other languages upon request. Any additional costs connected with translation are to be paid by the customer.

Supplementary certificates

Additional EMAS certificate in A4 format:	
Including aluminium frame per item	DKK 770
Exclusive aluminium frame per item	DKK 450

Additional EMAS certificate in A3 format:	
Inclusive aluminium frame per item	DKK 840
Exclusive aluminium frame per item	DKK 520

Discount for purchase of additional identical certificates:	
1 - 5 items	list price
6 - 20 items	list price - 30 %
more than 20 items	list price - 50 %

>1M EUR:	20	2000

Fee for BRC per audit

Annual fee per certificate	£125.00
Overseas companies are invoiced an additional per certificate.	£10.00

VA, MK AND ETA APPROVALS – ETA DENMARK

Schemes

MK approvals, VA approvals, ETAs

ETA Denmark issues Danish and European technical approvals of construction products. The national approvals consist of MK and VA approvals for materials and structures, and water supply and drainage products, respectively. They are issued on the basis of the requirements in the Danish building regulations and associated standards and guidelines.

The European technical approvals (ETAs) are issued in accordance with the EU directive concerning construction products and provide an opportunity for manufacturers or retailers to CE mark products. ETAs can be issued for products which are not covered by harmonising standards.

European Technical Approvals

European Technical Approvals are a positive assessment of a product's fulfilment of the Construction Product Directive's 6 most essential requirements and can form the basis for the product or construction system being CE marked by the manufacturer or dealer.

While European Technical Approvals are optional in Denmark, they are mandatory in certain member states if an ETA Guideline for the product family has been published.

Offer

Companies can arrange to receive an offer by contacting Department Manager, Thomas Bruun – email tb@dscert.dk. For further information, visit our website: www.dscert.dk - ETA Denmark.

MK (materials and structures)

The approval scheme (MK) primarily covers materials and structures etc. for construction. The approvals serve as documentation that the product fulfils the performance requirements as stipulated in the building regulations and associated guidelines. In certain cases, the regulations state that approved materials or structures must be used.

MK approvals also center on innovative construction products so that the manufacturers are able to document that the product is suitable for use and that it may be used in accordance with the Danish building regulations.

Conditions of approval

Approvals are based on current conditions of approval, standards and conditions of testing. ETA Denmark makes a determination in each individual case whether an approval may be issued on the basis of existing information about the product, for example, reports from foreign testing institutes. Alternatively, testing is conducted at a testing institute recognised by ETA Denmark in accordance with conditions of testing prepared by ETA Denmark. The testing results are included in a combined assessment of the product's suitability for approval. Approval may be granted for a specific area of use based on information from the applicant.

MK approval fees per 1/1 2011					
Grade	Approvals			Renewals	
	3 year	2 year	1 year	2 year	1 year
1	10,650	8,350	6,100	7,550	4,500
2	15,200	12,150	9,850	10,650	8,350
3	22,850	16,700	13,700	15,200	12,150
Converted to Euro at rate 7.40					
Grade	Approvals			Renewals	
	3 year	2 year	1 year	2 year	1 year
1	1,439	1,128	824	1,020	608
2	2,054	1,642	1,331	1,439	1,128
3	3,088	2,257	1,851	2,054	1,642

A renewal for a 3-year period is considered an approval for 3 years.

Renewal fees are conditional on the issue of new approvals with amendments, e.g., extensions, transfers or annulments etc.

For amendments considered to be non-essential for the content and extent of the approval, a maximum fee of DKK 3,000 will be charged. The amended approval is issued with the same date of expiry as the original.

VA (water supply and drainage systems)

The building regulations stipulate that water and drainage fittings must be designed so as to function satisfactorily in terms of fire, safety, performance and health. For guidance as to how this may be achieved, please refer to DS 432, Code of practise for drainage fittings, DS 439, Code of practise for water fittings and Pipeline centre regulations 011 Vacuum systems in buildings.

In order to fulfil building regulations, products that come in contact with drinking water must be VA-approved. It is only health-related qualities that require VA-approval.

Conditions of approval

The basis for VA approvals are the existing standards for water fittings and drainage fittings, respectively, which means that the approval scheme concerns material that is a part of the section of a water supply network or drainage system situated in buildings and connected property. ETA Denmark makes a determination in each individual case whether an approval may be granted on the basis of existing information about the product, for example, reports from foreign testing institutes. Alternatively, testing is conducted at a testing institute recognised by ETA Denmark in accordance with conditions of testing prepared by ETA Denmark. The testing results are included in a combined assessment of the product's suitability for approval. Approval may be granted for a specific area of use based on information from the applicant.

For amendments considered to be non-essential for the content and extent of the approval, there will be a maximum additional fee of DKK 3,000. The amended approval is issued with the same date of expiry as the original.

MK approval fees per 1/1 2011					
Grade	Approvals			Renewals	
	3 year	2 year	1 year	2 year	1 year
1	2,350	2,350	2,350	1,500	1,500
2	3,750	3,050	2,350	2,350	1,500
3	6,100	4,600	3,750	3,750	3,050

PRODUCT CERTIFICATION

Payment for services

Services provided by DS Certification within the area of product certification are normally paid in fees.

Certificate/license holders bear the costs of testing and internal and external supervision in the form of audits/inspections. Charges for additional services together with audits/inspections performed by DS Certification are invoiced separately in accordance with the hourly rates below.

Hourly rates

General hourly fee:	DKK 1,420 per hour
Travel fee:	DKK 690 per hour

The closing of non-conformities and observations are invoiced according to hourly rates.

Transport expenses

Transport expenses are invoiced according to actual costs. Transport is calculated according to state rates.

Offer

Companies can arrange to receive an offer by contacting DS Certification.

Certificates

The fee stated in the outline on pages 2 – 4 covers issue of one certificate in A4 format. The company may order additional identical certificates at any time. As a standard, the certificates are available in Danish or English.

All schemes (Price stated in DKK)

Application fee (if not stated otherwise)	DKK 3,640
Amendment of certificate	DKK 2,330
Additional certificate (A4) per certificate	DKK 450

Certificate presentation

For certificate presentation, an hourly rate will be invoiced together with transport rates in accordance with state rates and any toll fees.

Terms of payment etc.

All prices are in DKK and are exclusive VAT. The application fee is invoiced upon receipt of application. Invoicing of the annual fee occurs together with initial issue of the certificate after which the fee is to be paid annually. Charges for additional services/auditing charges are invoiced upon completion of services. Terms of payment are net 15 days. Paid fees will not be returned upon cancellation of the agreement or withdrawal of the certificate. Price regulation takes place 1 January.

Rescheduling of audit inspections

Audits or inspections may be rescheduled without cost up until 4 weeks prior to the scheduled audit date. In the event of rescheduling less than 4 weeks prior to the audit date, costs will be invoiced in accordance with the following guidelines:

Between 4 – 2 weeks prior to the audit date, 50 % of the audit costs (hourly fee) will be invoiced.

Less than 2 weeks prior to the audit date, 100 % of the audit costs (hourly fee) will be invoiced.

Courses

DS certification is one of the leading providers of courses within the training and further education of auditors, courses in the interpretation of standards, themed events, conferences and customised courses.

With open and customised courses, our extensive programme can be the way forward – a natural start on the process of certification, an equally natural continuation after certification or as inspiration in the use of standards and tools without actual certification.

DS Certification offers customised courses and themed events which provide information about standards and show how they may be used. We customise the course to fit the needs of your company and address the relevant issues precisely for you and your company.

Read more about courses on www.dscert.dk

Screening

DS Certification has developed a management tool which helps to unearth those performance areas that need to be prioritised. Via screening, we review the company's processes in relationship to the relevant management standards. We unearth strengths and opportunities for improvement in the company's processes. It provides a good overview of the current state of your company, and, in addition, insight into how prepared your company is for certification.

Read more about screening on www.dscert.dk

Second party audits and control audits

A second party audit or control audit is a tool for those companies that want to ensure that their sub-suppliers satisfy demands or would like to assist sub-suppliers in unearthing strengths and opportunities for improvement. In a second party audit, your sub-suppliers are audited by DS Certification on behalf of you and your company. It ensures independent assessments thereby strengthening the relationship between your company and your sub-suppliers and providing a factual basis from which to discuss the relationship between the company and the sub-supplier.

Read more about second party audits and control audits on www.dscert.dk

THE WORLD IS CHANGING...

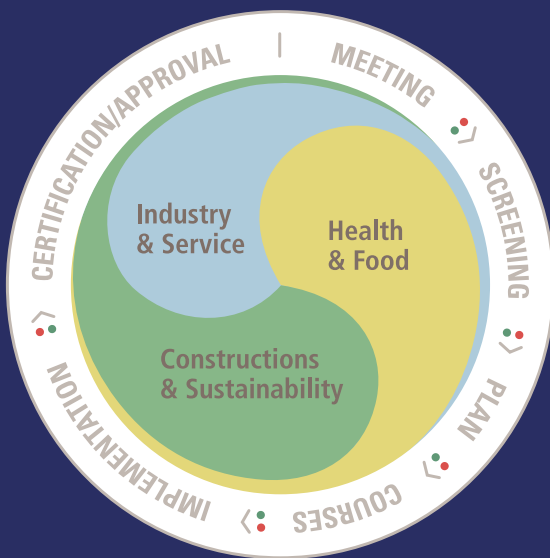

IS YOUR COMPANY KEEPING UP?

It is never wrong to do things right. Nor is it to do the right thing. In today's highly competitive, international market, it is more important than ever to have control of your company's processes – and be able to document this.

With certification from DS Certification, you gain a business advantage: Internally, in the form of a rational, systemised use of your company's resources and externally, by virtue of credible, impartial documentation for interested parties. Certifications are an increasingly decisive parameter for: the thumbs up or thumbs down by other companies when choosing a partner or supplier, consumers choosing your company and your products, getting a red or green light from legislation.

DS Certification's mission is to strengthen companies' competitiveness and supply them with increased value so that they might attain their goals and achieve credibility for interested parties. Certifications and approvals are in rapid growth both in terms of numbers and areas. Our ambition is a determination to be a complete supplier of certifications, approvals, courses, screenings and second party audits to support our customers' domestic and international business by creating products which are innovative and needs- and solution-oriented.

As an experienced and progressive partner, DS Certification can help you to develop your company. You will be met with an understanding of the nature of your company and the insight to ensure an easy and straightforward path towards certification.

TAKE THE FIRST STEP TODAY

CALL TO ARRANGE A NO-OBLIGATION MEETING WITH US

DS Certification was established in 1987 and has to date certified more than 1,700 companies. We are 60 employees, and from our offices in Charlottenlund and Århus, we offer system and product certification, product approvals, second party audits, screenings and courses. We are a complete supplier of national and international certifications and approvals within industry and service, health and food, construction and sustainability.

◀ THE CERTIFICATION WHEEL

The model shows DS Certification's product areas and areas of competency and illustrates the process towards certification.
